People everywhere are looking for healing. The challenging problems individuals face today demand more than just physical treatment. World wide people are turning to prayer for a more complete sense of healing. International speaker, Ron Ballard, says, "At its heart, spiritual healing explores how each of us can be whole. Understanding that God's commitment to each of us is love brings a power to healing that nothing else can."

In his talk he will explore the deeper issue of what constitutes healing, focusing on the need for spiritual regeneration and development. He shares examples of healing and explores the benefits of moving beyond physical care to spiritual restoration and wellbeing.
